David,

We have the opportunity to bid a project for an award-winning chef in Philadelphia and would like to have a drawing made of the attached quote. We are up against Jade and want to impress.

I quoted 2 - 6 burner ranges with s grates, one with a salamander broiler mounted, with an oven banking strip to hide the seam. We added a fryer with splash and common front rail spanning the entire unit.

Quoted from left to right.

Each unit is individually gassed except for the salamander, which is interconnected to the range.

Any questions please let me know.
