David,

Need a cashiers drawing – with specific dims on spec sheet

please see attached marked up spec for the hole cutout location, in red.

Thanks

i. We would like one 2" grommet, centered, placed 2" from the back edge of the station, assuming cables will clear both the drawer and the shelf at that location.

ii. We need clear unobstructed path from the top of the stand, through the horizontal surface (past the shelf), and through a corresponding hole in the bottom of the cashier stand. If this cannot be a straight path, please clarify.

iii. If cabling would not clear the drawer and the shelf with the grommet at this location, please provide a shop drawing showing the dimensions so we can better comment, or an alternate location which would allow for the above.

iv. Please provide a spec or drawing for the grommet cover.

v. Please do not fabricate until we receive and approve a dimensioned shop drawing.
